

THERMODYNAMIC STEAM TRAPS DT46

DESCRIPTION

The thermodynamic DT46 disc steam traps are compact and lightweight-easy to install traps, excellent for high pressure systems, including steam tracing applications.

The insulation cover ensures a consistent operation and makes it particularly suitable for those applications where the weather conditions, such as rain and wind, may affect the normal operation. These traps have only one moving part and offer a wide operating range, without adjustment.

MAIN FEATURES

Intermittent discharge.

Integral bimetallic air vent to avoid air blockage.

Complete with insulation cover to reduce heat and efficiency losses.

Operates with superheated steam.

The seat and disc can be easily replaced in field without removing the trap from the line.

Hardened seat and disk with duly lapped surface for longer service life.

Unaffected by water hammer and vibrations.

Built-in easy-to-clean strainer.

Blow-out proof seat gaskets suitable for high pressure conditions.

OPTIONS: Blowdown valve.

USE: Saturated and superheated steam.
